Re: Proposed Committee for the Cedar City Valley Water Management Plan

Dear Chairman,

The Board of Directors of Coal Creek Irrigation Company would like to respectfully request that you appoint our representatives to the Committee establishing a Cedar City Valley Water Management Plan. For your consideration, we would ask that you appoint our President, Ramon Prestwich, and Vice President, Joe Melling to the Committee.

Several varying entities use water within the basin: municipal, industrial, agricultural, etc. Therefore, each different entity should be represented and have input into the Management Plan.

Coal Creek Irrigation Company has approximately 90 shareholders with 9000 shares that farm approximately 9000 acres of land. Most of the shareholders not only have shares in the irrigation company but also have ground water rights that are used for the irrigation of their properties. We feel that for a proper management plan to be implemented which will help to stabilize the mining of the ground water, close coordination must take place between all water users in the Cedar City Valley.

If you have any questions, please feel free to contact any of the Officers or Board Members of Coal Creek Irrigation Company.

Cordially,

David Ence, Secretary
Coal Creek Irrigation Company
